26th November 2020,

REFERENCE LETTER - MR EHSAN MAHOOD

To Whom It May Concern,

I've had the pleasure of working alongside Mr. Ehsan Mahmood from April, 2019 – July, 2019 and was greatly impressed by his quiet diligence and enthusiasm to learn.

Ehsan joined Sonder as a Mechatronics Engineering intern over the Winter Internship program at Sonder.

With other members of Sonder, Ehsan worked on a Research and Development project, conducted extensive training in rapid prototyping technologies like CNC'ing, 3d printing and soldering..He was able to apply these skills in designing two projects, one where he designed and prototyped an enclosure for a prototype input device and additionally worked alongside Electrical engineers to ensure the final assembly worked correct. Additionally Ehsan was instrumental in preparing, testing and arranging the manufacturing of critical components of our flagship product, a smart keyboard.

I would not hesitate to recommend him to future employers looking to hire new talent.

Should you require any additional information regarding Ehsan's internship with Sonder, please do not hesitate to contact me on +61 2 9209 4444 or directly on +61 416 444 536.

Sincerely,

Francisco Serra-Martins
Director | Chief Executive Officer
